❏ RUBBISH COLLECTION AND DISPOSAL

Rubbish Collection is currently on a Tuesday morning.

Should you be staying at the property when the usual rubbish and recycling collection cycle occurs, please ensure the bins are placed on the kerbside and returned to the house after collection.

- *Recyclable and perishable goods must be placed into the appropriate bins, complying with the local Council restrictions and/or requirements.*
- Rubbish, recycling and food scraps bin information can be found on the Auckland Council website - [Find your rubbish, recycling, and food scraps collection day](#)

Should rubbish collection NOT be scheduled whilst you are staying at the property, please take your rubbish home with you, or drop it off at the local recycling station on Ostend Road.

- *Please note that Council inspects recycling bins before collection to ensure that “recycling waste only” is placed in the bins*
- *If rubbish is left in the recycling bins, is not placed out for collection and/or not sorted according to council requirements, you may be liable to pay for costs associated with waste removal.*

❏ WATER

The water supply is TANK water only. **Please conserve water** by having limited short showers and using the public shower by the beach whenever possible

Use the washing machine only when necessary - a laundromat is situated in Tahi Road if any washing is required.

There is a 30 – 40 day lead time on water deliveries throughout summer. Turn off all taps

Please monitor the water tank level and let us know *immediately* if water levels are running low.

BURST WATER PIPES

In an emergency and the unlikely event of a burst water pipe or water leak/flood in the house, turn off the water supply by turning off the power switch on the water pump situated underneath the house. In addition, turn off the water outlet valve on the hot water cylinder situated in the hallway linen cupboard.

Call the Emergency Contact number immediately

❏ SEPTIC TANK

Using too much water, bleach, non-septic tank compliant cleaning products, or putting grease down the drain, seriously harms the septic tank chemical process.

Do not flush wet wipes, sanitary pads, tampons, or other foreign objects down the toilet as these also destroy the septic tank chemical process.
